

1 Q. Ref: Schedule B, Replace VHF Mobile Radio System, p. B-71. Reference is
2 made in the *Business Case* (Section 5.3, p. 11) to the fact that the proposed
3 system can be used to provide communications for CF(L)Co. in the future.
4 Has Hydro entered in any agreements or understandings with CF(L)Co.
5 regarding this future use?
6
7

8 A. The reference made to the fact that the system can be used to provide
9 communications for CF(L)Co. in the future is referring to the technology and
10 not to Hydro's VHF mobile radio system as proposed. The intent of the
11 statement is that the technology proposed by Hydro would also be a good
12 technical fit to meet CF(L)Co's VHF communications requirements. On an
13 as requested basis Hydro's communication engineers provide services to
14 CF(L)Co. The selection of a single technology by both CF(L)Co. and Hydro
15 would have inherent advantages.
16

17 Hydro has not entered into any agreements or understandings with CF(L)Co.
18 regarding future use of Hydro's VHF mobile radio system. At present
19 CF(L)Co. has no plans to replace its VHF mobile radio system.
