

- 1 Q. **Re: p. B-19** What reduction in staff complement and retirement of
2 equipment results from the implementation of this Project?
3
4
- 5 A. Staff complement will not be reduced, but the labour cost expended on
6 removing mussels from the cooling water system will be eliminated. No
7 equipment will be retired. Additional savings will be realized as diving and
8 vacuum truck contractors will not be required to remove mussels.
