

1 Q. **Re: p. B-28** Break out portion of this Project being specifically assigned to  
2 Hydro Rural or another customer group and the portion assigned to common  
3 in the Cost of Service Study.

4

5

6 A. The actual work on each transmission line will be determined through the  
7 inspections each year. Based on the poles to be inspected, the plant  
8 assignments are estimated as follows:

9

10	Common - Island Interconnected	30%
11	Common - Labrador Interconnected	20%
12	Hydro - Rural	39%
13	Newfoundland Power	11%
