

1    Q.    Alternatively would all industrial customers be one class with historical  
2           balances of the RSP being assigned as a specifically assigned charge to the  
3           Industrial Customers on the system at the time that the charges were  
4           accumulated?

5

6

7    A.    Please see response to PUB 9 NLH. While the balances would not be  
8           specifically assigned, two energy rates would be published.
