

1 B-70 Upgrade Distribution Systems

2 Q. Ref: PUB 19 NLH

3 Does NLH intend, at some time in the future, to collect data related to:

- 4 - expenditures for each distribution line serviced;  
5 - the length of the lines affected; and  
6 - the average cost per kilometer of line?

7

8

9 A. No. Hydro collects the expenditures for distribution upgrades in the capital  
10 reporting system but only on an aggregate level by system and region.

11 Hydro does not record costs by individual line, line length or unit cost. Every  
12 project is unique and individually designed and managed. This varied scope  
13 of work results in a different cost per kilometer of upgrading.
