

1 **Q. Please provide details of any meetings the Company has had in reference to the**
2 **Voisey's Bay Project for the provision of electrical services.**
3

4 A. Newfoundland Power has not had meetings with Voisey's Bay representatives regarding
5 the provision of electrical services for the Voisey's Bay Project. The Company has had
6 some informal conversations with Voisey's Bay representatives with respect to the
7 proposed pilot plant at Argentia. Initial indications are that the pilot plant's electrical
8 demand will not require a transmission line extension, and that an extension to the site
9 from an existing distribution feeder in the area will be sufficient to supply the anticipated
10 load.
