

1 **Q. Please advise what similar on-site fueling programs are in place for other areas of**
2 **the Province.**

3
4 A. An on-site fueling program is currently only in place for the Company's vehicles within
5 the St. John's Area. The program was previously considered for other Area/District
6 Offices where mobile diesel units were available from the Supplier, but such programs
7 did not prove to be cost effective for the Company and/or Supplier (mainly due to the
8 smaller number of units available for on-site fueling in these areas).
