

1 **Q. In reference to the evidence of Earl Ludlow, page 36, line 15, please provide a**
2 **statistical analysis to show that the Company’s response to outages caused by severe**
3 **weather is further enhanced by the existence of a detailed contingency plan.**
4

5 A. No statistical analysis has been conducted to support this statement. It is readily apparent
6 that the availability of a detailed contingency plan to assist in the event of outages caused
7 by severe weather will improve the Company’s response and ensures the most effective
8 use of available resources.
