

1 **Q. Has the Board 's recent ruling regarding treatment for transformer losses been**
2 **incorporated into Newfoundland Power's load forecast?**

3
4 A. The Board's recent ruling regarding the treatment for transformer losses (contained in
5 Order No. P.U. 7 (2002-2003) from Newfoundland and Labrador Hydro's General Rate
6 Proceeding) is not incorporated into Newfoundland Power's load forecast filed in
7 conjunction with the 2003 General Rate Application.

8
9 This was excluded from the load forecast, as the impact of the change had not been fully
10 determined at that time.

11
12 Newfoundland Power will be filing a revised load forecast prior to the commencement of
13 the hearing into its 2003 General Rate Application that will reflect the Board's recent
14 ruling regarding the treatment of transformer losses.
