Q. Provide the statistical confidence level of the customer impacts shown in each of L. Henderson's Tables 7- 9.

A. Table 1 below provides the designed accuracy for the samples selected for each of the Domestic, Rate 2.1 and Rate 2.2 classes based on average monthly consumptions at 95% confidence.

Table 1 Designed Sample Accuracy	
Rate Class	Relative Accuracy
Rate 1.1Domestic	3.0%
Rate 2.1 G.S. 0-10 kW	4.4%
Rate 2.2 G.S. 10-100 kW (110 kVA)	3.7%

Table 2 below provides the accuracy of the bill impacts per sample group compared to the class impacts.

Table 2 Illustration of Achieved Sample Accuracy		
Rate Class	Class Revenue Increase	Sample Revenue Increase
Rate 1.1Domestic	0.96%	0.96%
Rate 2.1 G.S. 0-10 kW	0.96%	0.91%
Rate 2.2 G.S. 10-100 kW (110 kVA)	0.96%	0.95%
