

- Q. Please provide a detailed description of Dr. Kalymon's industrial sample selection process as outlined in Appendix B. Include the number of companies in the initial universe and the number excluded at each step. Please provide the data for the initial universe in electronic format.
- A. **Attached is an Excel file "NP-238 Industrial Companies Sample Selection" which outlines the steps taken for the selection process used to identify the industrial companies used in the submitted schedules. A "Summary" worksheet is included in each excel files to outline the number of companies that are remaining and have been discarded after each step. Also worksheets were created to show what the list of companies looks like after the particular step is executed in the selection process. Please note that the name of each worksheet corresponds to the step that was executed to derive the results found in that worksheet.**

NP-238

Summary - Industrial Companies

Step 1	The compiled list of companies, found in the following S&P TSX industry codes: 20 - Industrials 25 - Consumer Discretionary 30 - Consumer Staples 35 - Healthcare 15 - Materials 50 - Telecommuncation Services Initial # of Companies620
Step 2	Filter out the companies that did not over 1 million shares being traded in 2001 from the list compiled in Step 1 # of Companies Excluded205 Total # of Companies Remaining415
Step 3	Calculated the 10 year variance of the returns on equity and ranked in order of lowest to highest, and dicarded some of the higher variances # of Companies Excluded46 Total # of Companies Remaining369
Step 4	Filter out lower risk companies that do not have 11 years of data, ending in 2001 to determine sample of 24 # of Companies Excluded391 Total # of Companies Remaining24
