

- 1 **Q. Please provide all studies, documents and workpapers on which Mr. Brockman**
2 **bases the statement in his expert evidence, page 4, “Demand related costs represent**
3 **approximately 54 per cent of the Company’s total cost of serving customers.”**
4
- 5 A. The basis for the above statement is derived from Newfoundland Power’s 2001 Cost of
6 Service Study, Exhibit LCH-2, page 9 of 40. Fifty-four per cent is calculated by dividing
7 the total demand cost in column B, line 17 (\$179,499) by the total cost of service (before
8 rural deficit) in column F, line17 (\$332,105).
