

1 **Q. DISTRIBUTION**

2  
3 **PUB 11.0 (RE: p. 33 & 34 of 73) Meters (\$965,000)**

4  
5 **PUB 11.3**

6 **Of the meters taken out of the service to install AMR meters, show the number that**  
7 **has been re-used in each year that AMR meters have been installed.**

8  
9 A. The Company does not track each individual meter that is removed to determine if it is  
10 re-used. Therefore, the information requested on the number re-used by year is not  
11 available.

12  
13 On average, 30% of the meters that have been replaced by AMR meters have been  
14 reusable. Therefore, approximately 1,500 of the meters that have been removed have  
15 been or will be re-used.
