

1 **Q. DISTRIBUTION**

2  
3 **PUB 15.0 (RE: p. 41 & 42 of 73) Reconstruction (\$2,825,000)**

4  
5 **PUB 15.3**

6 **For each year how many projects with an expenditure of under \$50,000 were**  
7 **undertaken?**

8  
9 A. A detailed review of our reconstruction activity year-to-date indicates that there have  
10 been a total of approximately 160 reconstruction jobs completed between January and  
11 June of 2004. The Company would expect a similar number for the remainder of the year  
12 for a projection of 320 reconstruction jobs for 2004. Historical information on the  
13 number of reconstruction jobs per year is not readily available.

14  
15 As explained in response to Request for Information PUB 15.2 NP, the Company's  
16 accounting system does not maintain the information on the cost of each individual  
17 reconstruction job. However, based on the \$1,372,000 total expenditures for  
18 Reconstruction for the period January and June 2004 and a total job count of 160, the  
19 average level of expenditure per job has been approximately \$8,600. The Company  
20 would expect that each reconstruction job cost less than \$50,000.
