4
5 **PUB 2.2**

6 **In considering and evaluating the relocation of the unit from Salt Pond to**
7 **Wesleyville was the cost of the overhaul included in the cost benefit analysis? Please**
8 **provide evidence.**

- 9
10 A. At the time the decision to relocate the unit was being evaluated, Newfoundland Power
11 was not aware of the need to overhaul the gas generator, and the costs of an overhaul
12 were therefore not considered in the Company's analysis. In March 2003, immediately
13 prior to the move, an inspection by Rolls-Royce determined the need to overhaul the unit.
14
15 However, because the overhaul of the gas generator would have been necessary in any
16 event, the costs associated with the overhaul would not have been a factor in the decision
17 to relocate the plant.
