6 **Will the purchasing of materials in bulk rather than “just in time” purchasing**  
7 **result in additional storage costs that have been considered in the cost benefit**  
8 **analysis of this project?**

9  
10 A. The impact of purchasing materials in bulk rather than “just in time” on storage was  
11 considered in the analysis. However, it has been determined that existing facilities are  
12 adequate to house the required inventory, and no additional storage costs will be incurred  
13 as a result of this project.
