

1 **Q. ENERGY SUPPLY**

2
3 **PUB 39.0 (RE: B- 14, Rattling Brook, Volume II, Energy Supply, Appendix 3,**
4 **Attachment A, Schedule D)**

5
6 **PUB 39.1**

7 **Confirm that the “estimated long term production” used to conduct the feasibility**
8 **analysis (p. 2, Section 4.0 Benefits) is the same as “the average annual actual hydro**
9 **production” for the plant.**

10
11 A. The “estimated long term normal production” used to conduct the feasibility analysis is
12 not the same as “the average annual actual hydro production” for the Rattling Brook
13 plant. For clarification, please refer to the response to Request for Information PUB 38.1
14 NP.

15
16 If the average annual actual hydro production for the Rattling Brook Plant were used in
17 the feasibility analysis, it would not materially affect the conclusions.
