

1 **Q. SUBSTATIONS**

2
3 **PUB 4.0 (RE: p. 17 & 18 of 73) Rebuild Substations (\$351,000)**

4
5 **PUB 4.2**

6 **What was the cost of constructing each of these existing weather enclosures?**

7
8 A. The existing weather enclosures were included as part of a factory-constructed modular
9 assembly when the high voltage breakers, protective relaying, switches and ancillary
10 equipment were purchased. Consequently, separate cost information is not available for
11 the original enclosures.

12
13 It is typical to have the weather enclosures included when assembling new substation
14 equipment of this type. In this instance, however, the enclosed equipment is in good
15 condition, and it is only necessary to replace the enclosures.
