| 1  | Q. | <u>CAPITAL EXPENDITURE REPORT – VARIANCES</u>  |
|----|----|--|
| 2  |    |  |
| 3  |    | PUB 41.0 (RE: 2004 Capital Expenditure Report, Volume I)                                   |
| 4  |    |  |
| 5  |    | PUB 41.1   |
| 6  |    | Explain why if "The alarms project was not originally included in the budget for           |
| 7  |    | 2004" (Appendix A, p.1, Item 1) the Company did not seek approval from the                 |
| 8  |    | Board prior to proceeding with the project.  |
| 9  |    |  |
| 10 | A. | Section 41 (3) of the <i>Public Utilities Act</i> provides, in part, as follows:           |
| 11 |    |  |
| 12 |    | "A public utility shall not proceed with the construction, purchase or lease of            |
| 13 |    | improvements or additions to its property where  |
| 14 |    |  |
| 15 |    | (a) the cost of the construction or purchase is in excess of \$50,000;                     |
| 16 |    |  |
| 17 |    | without the prior approval of the board."  |
| 18 |    |  |
| 19 |    | The cost to install the fire and intruder alarms is forecast to be \$48,000. Consequently, |
| 20 |    | specific prior approval of the Board is not required.                                      |
