

- 1 **Q. Who will have responsibility for the design work in relation to the penstock as**
2 **proposed for Rattling Brook and does that entity or entities, as the case may be,**
3 **have experience and expertise in relation to the design as used in the aforesaid**
4 **Michigan project?**
5
- 6 A. Newfoundland Power engineering staff will have the responsibility for the design of the
7 penstock proposed for Rattling Brook.
8
- 9 The design used at the Upper Peninsula Power Company's 2001 Victoria Dam penstock
10 replacement is relatively unique for a hydroelectric power plant application.
11 Accordingly, few engineers would have experience and expertise in relation to the
12 design. No engineering staff at Newfoundland Power has such experience.
13
- 14 Please refer to the Response to CA-18.0 NP.
