

- 1 **Q. In the opinion of Newfoundland Power Inc., would it be beyond the ability of**
2 **probable bidders of the Rattling Brook penstock as proposed to carry out a**
3 **successful installation using the methods employed in the Michigan project?**
4
- 5 A. In the opinion of Newfoundland Power it would not be beyond the ability of the probable
6 bidders to carry out a successful installation using the methods employed in the Upper
7 Peninsula Power Company's 2001 Victoria Dam penstock replacement.
8
- 9 The field installation methods used on the Victoria Dam penstock are standard
10 construction methods used in heavy civil construction and the proposed bidders for the
11 proposed Rattling Brook penstock would be capable of performing such work.
