The responses noted above include responses to all of the Board's Requests for Information, as well as responses to those inquiries which would provide the most in depth analytical information for use by the Parties. There are approximately 54 Requests for Information outstanding as of today's date. Hydro requests an extension of time for the filing of the remaining responses to Friday, July 12, 2019. Among other things, Hydro is currently working to complete the 2017 General Rate Application ("GRA") Compliance Application. Both the responses to the Cost of Service Requests for Information and the 2017 GRA Compliance Application are specialized regulatory matters that require the full attention of a limited number of people and cannot be reassigned. The confluence of these activities requires

prioritization for completion. An extension to complete the Request for Information responses will allow for a continued focus on a timely completion of the 2017 GRA Compliance Application.

Should you have any questions, please contact the undersigned.

Yours truly,

NEWFOUNDLAND AND LABRADOR HYDRO
