
1 Q. PUB-NLH-26 (Rev 1 July 31-09) shows that NP would receive a rate reduction of
2 12.1% if the IC RSP balance owing to the load variation component were disbursed
3 on Dec 31, 2009 on the basis of 2009 load share. Please provide an estimate of the
4 percentage rate reduction that retail customers would receive if NP were to receive
5 a 12.1% rate decrease.

6

7

8 A. It is estimated that the retail customers would receive a rate reduction of
9 approximately 8% if NP were to receive a 12.1% rate decrease.
