 2 Install Additional Washrooms (Various Sites):  
 3 At p. D-210 it states that there are approximately sixty Hydro facilities which  
 4 require an additional washroom under this program, including all of Hydro’s remote  
 5 sites, terminal station control buildings, diesel generation plants, and hydroelectric  
 6 plants. Please provide a list of all sites with brief description and location.

7  
 8 A. As stated on page D-210 Hydro approximates that sixty facilities will require  
 9 upgrades to facilitate the installation of a separate washroom facility. The  
 10 complete list of structures, and the order in which they will be completed, will be  
 11 developed during the first year of the program. An approximation of the facilities  
 12 requiring an additional washroom is as follows. The following list is not considered  
 13 to be all inclusive and may be modified once the facility assessment is complete.
