

1 Q. What is NP's hydraulic peak installed capacity, annual average energy and load
2 factor?

3

4

5 A. Newfoundland Power's hydraulic peak installed capacity, annual average energy
6 and load factor [] are as follows:

7

- Hydraulic Peak Installed Capacity: 94.2 MW

8

- Annual Average Energy: 432.1 GWh

9

- Annual Load Factor: 0.52
