

1 Q. Further to response to Request for Information NP-NLH-136:
2 Please compute the demand charge per month in the wholesale rate to
3 Newfoundland Power that would be proposed (based upon the proposed rate
4 design methodology) if the 2013 Test Year purchases from Nalcor were classified as
5 100% energy.

7

8 A. []

9

10 Based on the NP demand rate recommendation included in Section 4.5 of Hydro's
11 Amended Application, a change in the classification of purchases from Nalcor in the
12 2015 Test Year Cost of Service Study would not result in a change in the proposed
13 demand charge in the wholesale rate to Newfoundland Power. See Hydro's
14 response to CA-NLH-157.
