

1 Q. Further to response to Request for Information NP-NLH-147:
2 The response to Request for Information NP-NLH-146 shows a material increase in
3 the forecast capacity factor at Holyrood over the period 2014-2017 (i.e., a low of
4 35% in 2014 to a high of 45% in 2016 and 2017) as compared to the 5-year historical
5 average (approximately 22%). Does the forecast material increase in the capacity
6 factor merit consideration in determining the appropriate Holyrood capacity factor
7 to be used in the 2013 Test Year?

8

9

10 A. Please refer to Hydro's response to NP-NLH-147 for Hydro's rationale in using the
11 five-year historical average for Holyrood capacity factor rather than forecast values.
