

1 Q. Exhibit 30 – LCP Design Progression indicates “Fish habitat will be based on
2 compensation strategy agreed with DFO”. It also indicates a “Fish Compensation
3 Flow will be approximately 30% of mean annual flow”. What variations in
4 generation from Muskrat Falls could be expected as a result of changes in projected
5 in stream flow requirements? Please show anticipated seasonal generation profile
6 of Muskrat Falls.

7

8

9 A. The requirement of 30% mean annual flow for fish compensation flow is a
10 requirement for the impoundment of the reservoir during construction and is not
11 an operations requirement.
