

1 Q. Consumer Question: Further to the preamble outlined in CA/KPL-Nalcor-194, can
2 Muskrat Falls generate additional energy beyond the projected 4.5TWh, with
3 improved water management and with the direct engagement of Hydro Quebec?
4

5
6 A. In Nalcor's view, no opportunities exist to generate additional energy or to improve
7 water management, either in the form of a revised water management agreement
8 or through the engagement of Hydro Quebec. The terms of the water management
9 agreement established pursuant to Board Order PU 8 (2010) are sufficient to
10 optimize production.
