

1 Q. Consumer Question: Has the Government of Newfoundland Labrador researched
2 the potential of alternative micro-energy generation that falls outside of either
3 Muskrat Falls or wind turbines (ie. waterflow energy generation WFEG)?
4
5

6 A. The technical and economic feasibility of micro-energy generation (including water
7 flow energy generation) have not been established on a large scale basis. Therefore
8 Nalcor has not studied it or other alternative micro-energy generation concepts.
