

1 **Re Page B-36:**

2 Q. According to the Introduction to the SGE Acres report “Evaluation of Fuel Oil
3 Storage Tanks, Associated Pipelines and Dyked Drainage System” (Section
4 H, Tab 2 of Hydro Application), the objective of the assessment was to
5 determine the extent of upgrades required for the tanks, pipelines, and
6 drainage, as well as power and lighting system, to extend the useful life of
7 the facility [the Tank Farm] by at least 20 years. Has Hydro determined that
8 the Holyrood Terminal Generating Station will be in service for another 20
9 years?

10

11

12 A. Hydro does not have plans to remove the Holyrood Thermal Generating
13 Station from service in the near future. The scope of work proposed is
14 required to ensure that the fuel storage facility can remain in operation until
15 at least 2015.
