

1 **Re: Page B-135, Construct New Office, Warehouse and Line Depot Facilities,**
2 **\$1,247,900:**

3 Q. How does Hydro intend to deal with the WHLBD and the possibility of
4 contamination of the site? Has this possibility been considered in the cost
5 benefit analysis?

6

7

8 A. After construction of the new facility, Hydro will develop a decommissioning
9 plan for the WHLDB site based on good environmental practice and the
10 requirements of the regulatory authorities. The scope of work will depend on
11 the level of contamination revealed when field testing is completed.

12

13 The cost of decommissioning the existing facilities is not part of the capital
14 budget proposal.
