

1 Q. **B-56, Replace Vehicles and Aerial Devices 1,711,400**

2 Why is this treated as a two year project that is requested every year?

3

4

5 A. Replacement of Aerial Devices typically takes 12 to 18 months to complete because
6 of scheduling constraints by the chassis, boom and body manufacturers. As a result,
7 the capital budget proposal is submitted as a two year project and revised every
8 year to ensure the latest information is available.
