

1 **Reference:** On page 9, Ms. Lee indicates Hydro should be asked to review its records
2 and provide the Board with options regarding a correction.

3 **NLH-IC-17** Please provide a list of all regulatory decisions requiring a regulated utility
4 to provide its regulator with similar options when the utility was calculating
5 its depreciation in accordance with the methodology approved by its
6 regulator.

7 **RESPONSE:** This request is vague and ambiguous. It is unknown if the request is for
8 Canadian regulatory decisions or if it goes to all US and Canadian regulatory
9 decisions. In either case, such would require research by Ms. Lee that is not
10 within the time constraints of the instant RFI responses.
