

1 Q. Please explain why there was no Professional Appraisal done on this unit to  
2 determine condition and fair market value.

3

4

5 A. A third party inspection of the unit was completed between April 28 and May 1,  
6 2014 to evaluate the condition and suitability of the unit for use. The unit was  
7 found to be in good condition, stored in accordance with OEM requirements, and  
8 suitable for use. Fair market value was established through the public tender  
9 process, where the lowest qualified bid was selected.
