

Newfoundland Labrador Hydro (NLH) Supply and Demand Status Report Filed Monday, July 04, 2022

Section 1 Island Interconnected System Supply, Demand & Exports Actual 24 Hour System Performance For Thursday, June 30, 2022

Supply Notes For June 30, 2022

1,2

- A As of 0857 hours, April 04, 2022, Holyrood Unit 3 unavailable due to planned outage (150 MW).
- B As of 1327 hours, May 08, 2022, Bay d'Espoir Unit 6 unavailable due to planned outage (76.5 MW).
- C As of 2351 hours, May 28, 2022, Holyrood Unit 2 available but not operating 150 MW (170 MW).
- D As of 0800 hours, June 08, 2022, Holyrood Unit 1 unavailable due to planned outage (170 MW).
- E As of 1214 hours, June 19, 2022, Bay d'Espoir Unit 7 unavailable due to planned outage (154.4 MW).
- F As of 1422 hours, June 19, 2022, Granite Canal Unit unavailable due to planned outage (40 MW).
- G At 0832 hours, June 30, 2022, St. Anthony Diesel Plant available at full capacity (9.7 MW).

Section 2 Island Interconnected Supply and Demand

Fri, Jul 01, 2022	Island System Outlook ³	Seven-Day Forecast	Temperature (°C)		Island System Daily Peak Demand (MW)			
			Morning	Evening	Forecast	Adjusted ⁷		
Available Island System Supply: ⁵	1,417 MW	Friday, July 1, 2022	15	17	895	895		
NLH Island Generation: ^{4,8}	930 MW	Saturday, July 2, 2022	18	17	885	885		
NLH Island Power Purchases: ⁶	110 MW	Sunday, July 3, 2022	18	17	895	895		
Other Island Generation:	225 MW	Monday, July 4, 2022	15	16	885	885		
ML/LIL Imports:	152 MW	Tuesday, July 5, 2022	15	16	755	755		
Current St. John's Temperature & Windchill:	18 °C	N/A	°C	Wednesday, July 6, 2022	13	12	785	785
7-Day Island Peak Demand Forecast:	895 MW	Thursday, July 7, 2022	15	13	785	785		

Supply Notes For July 01, 2022

3

- Notes:
1. Generation outages for running and corrective maintenance are included. These are not unusual for power system operations. They generally do not impact customer supply. The power system operators schedule outages to system equipment whenever possible to coincide with periods when customer demands are low and sufficient supply reserves are available. However, from time to time equipment outages are necessary and reserves may be impacted.
 2. Due to the Island system having no synchronous connections to the larger North American grid, when there is a sudden loss of large generating units there may be a requirement for some customer's load to be interrupted for short periods to bring generation output equal to customer demand. This automatic action of power system protection, referred to as under frequency load shedding (UFLS), is necessary to ensure the integrity and reliability of system equipment. Under frequency events have typically occurred 5 to 8 times per year on the Island Interconnected System and the resultant customer load interruptions are generally less than 30 minutes. With the activation of the Maritime Link frequency controller during the winter of 2018, UFLS events have occurred less frequently.
 3. As of 0800 Hours.
 4. Gross output including station service at Holyrood (24.5 MW) and improved NLH hydraulic output due to water levels (35 MW).
 5. Gross output from all Island sources (including Note 4).
 6. NLH Island Power Purchases include: CBPP Co-Gen, Nalcor Exploits, Rattle Brook, Star Lake, Wind Generation and capacity assistance (when applicable).
 7. Adjusted for curtailable load, market activities and the impact of voltage reduction when applicable.
 8. Due to limitations inherent in the design of combustion turbines, the output of combustion turbines may be reduced in the event that ambient temperatures exceed the threshold

Section 3 Island Peak Demand Information Previous Day Actual Peak and Current Day Forecast Peak

Thu, Jun 30, 2022	Actual Island Peak Demand ⁹	11:50	867 MW
Fri, Jul 01, 2022	Forecast Island Peak Demand		895 MW

Notes: 9. Island Demand / LIL / ML Exports (where applicable) is supplied by NLH generation and purchases, plus generation owned and operated by Newfoundland Power and Corner Brook Pulp & Paper (Deer Lake Power, DLP).
