

1 Q. Re: Recommendation 2.16 (Liberty Report, p. 36)

2 Citation:

- 3 • With respect to longer term options, ensuring that work now proceeds with  
4 as clear an understanding as possible of the costs avoided by and the  
5 benefits made available to customers who bear responsibility for new  
6 capacity costs and the costs of conservation and demand management  
7 costs, in order to provide a sound foundation for determining what  
8 measures and programs should be instituted.

9 What are the steps to be taken by Hydro, by NP and by the Board in order to ensure  
10 that these resources are made available as promptly as possible?

11

12

13 A. It is not clear as to what “these resources” in this question is referring. Assuming  
14 however, that the question is concerning the development of conservation and  
15 demand management programming including the development of marginal costs,  
16 please refer to Hydro’s responses to GRK-NLH-076, GRK-NLH-081, GRK-NLH-083,  
17 and GRK-NLH-084.
