

1 Q. **Reference: 2026 GRA – Volume 1, Section 6.9.1 Rate Structure, p. 203 pdf**

2 Citation

3 “The average embedded cost for transmission demand allocated to Labrador Industrial
4 customers has increased from \$1.08 per kW per month for the 2019 Test Year to \$2.00 per kW
5 per month for the 2027 Test Year. The increase results from additional transmission investment
6 over an eight-year period on the Labrador Interconnected System, reflected in the 2027 Test
7 Year, compared to the 2019 Test Year, as well as an increase in cost allocated to this customer
8 class due to increased load compared to the 2019 Test Year.”

9 Please provide a detailed list of the transmission assets added to the Labrador Interconnected
10 System rate base since 2019, with amounts and year of commissioning for each.

11
12
13 A. Please refer to Newfoundland and Labrador Hydro’s response to IOC-NLH-001 of this proceeding
14 for additions to the Labrador Interconnected System.
