

1 Q. **Reference: Supplemental Material, Schedule A-VI, Energy Purchases**

2 Provide an explanation for the variance in the 4th Quarter between 2025F and 2025 Actual for
3 CBPP Co-generation and Exploits.

4

5

6 A. There were 16.0 GWh of Corner Brook Pulp and Paper Limited ("CBPP") Co-Generation
7 deliveries forecast for the fourth quarter of 2025; these deliveries were included in 2025F.
8 Deliveries under the CBPP Co-Generation contract were paused throughout the fourth quarter
9 of 2025, resulting in a decrease of 16.0 GWh in the 2025 Actuals.

10 Exploits deliveries were forecasted to follow a typical profile in the fourth quarter of 2025.
11 However, actual deliveries were lower than forecast as a result of low inflows due to drought
12 conditions on the Island, resulting in a decrease of 54.8 GWh in the 2025 Actuals compared to
13 the forecast.
