

1 Q. **Reference: Volume I, Section 6.9.1, page 6.29**

2 Hydro states that the increase in the average embedded cost for transmission demand allocated
3 to Labrador Industrial Customers results from additional transmission investment over an eight-
4 year period on the Labrador Interconnected System, reflected in the 2027TY, compared to the
5 2019TY, as well as an increase in cost allocated to this customer class due to increased load
6 compared to the 2019TY.

7 **a)** Provide a list of the referenced transmission investments on the Labrador
8 Interconnected System, including dates, a description of the work and costs.

9 **b)** Provide the basis and the calculation for the proposed increase in cost allocated to the
10 Labrador Industrial Customer class.

11
12
13 A. **a)** Please refer to Newfoundland and Labrador Hydro's ("Hydro") response to IOC-NLH-001 of
14 this proceeding.

15 **b)** Please refer to Hydro's response to IOC-NLH-006 of this proceeding.
